Bismuth Balanced Fund Factsheet

28th of June, 2018

Investment Objective

Bismuth Balanced Fund is a Subfund of Bismuth Structured Products Fund. The Subfund's investment goal is to collectively invest the accumulated funds in transferrable Structured Financial Products (SFP), the return on which may depend on the return on other Underlying Asset (UL) and which may have a certain nominal invested amount protection level, in addition to the issuer's credit risk following the ISDA regulations of 2014.

All SFP, where the Subfund will invest, will be registered in a Regulated Market(-s) and/or will be traded in the multilateral trade system.

The Subfund will invest 25-50% of its NAV in capital protected SFP. However, the Subfund has the right to invest more than 50% of the NAV in capital protected SFP in view of the situation in the financial markets.
